

# SOPHiA INTEGRATED

Enable equal access to effective genomic applications worldwide

## APPLICATION LIST

Exome  
Solutions

Oncology

Hereditary  
cancer

Metabolism

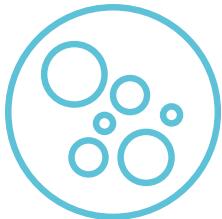

Pediatrics

Cardiology

SOPHiA™

## Oncology

### SOPHiA Myeloid Solution

30 genes<sup>(1, 2)</sup>

### SOPHiA Solid Tumor Solution

42 genes<sup>(1)</sup>

### SOPHiA mini Homologous Recombination Solution

4 genes

### Tumor Hotspot Application

26 genes

### NRAS, KRAS & BRAF Application

BRAF, KRAS and NRAS genes

### BRCA1 & BRCA2 Application

BRCA1 and BRCA2 genes<sup>(2)</sup>

### Solid Tumor Applications

- panel of 15 genes
- panel of 56 genes
- panel of 170 genes<sup>(1, 3)</sup>

## Hereditary Cancer

### SOPHiA Hereditary Cancer Solution

26 genes

### SOPHiA Expanded Hereditary Cancer Solution

- panel of 33 genes
- panel of 56 genes

### Hereditary Cancer Application

94 genes<sup>(1)</sup>

### BRCA1 & BRCA2 Application

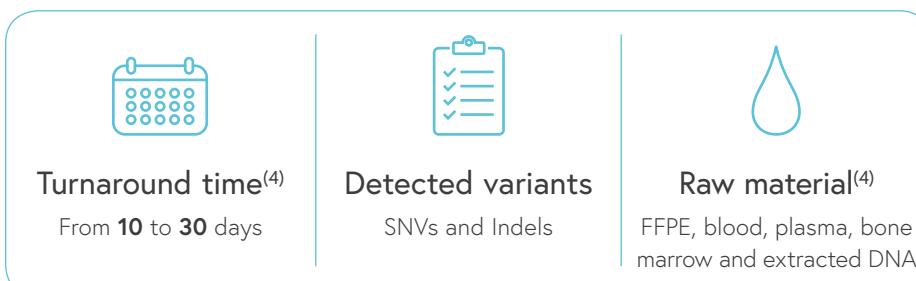

BRCA1 and BRCA2 genes

### Lynch Syndrome (HNPCC) Application

MLH1, MSH2, MSH6 (excluding exon1), PMS2 and the 3' UTR of EPCAM gene

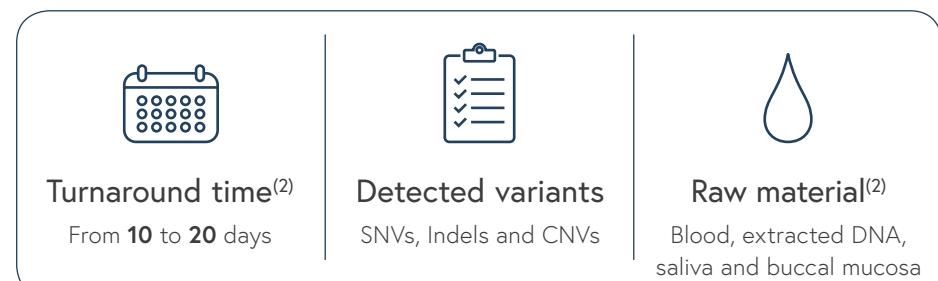

### Familial Adenomatous Polyposis (FAP) Application

APC and MUTYH genes

kit + data analysis

- (1) Fusion detection available  
 (2) CNV detection available for all the genes  
 (3) Available soon  
 (4) Depending on the application

kit + data analysis

- (1) CNV detection only available for 11 genes  
 (2) Depending on the application

## Pediatrics

### SOPHiA Nephropathies Solution

44 genes

### Cystic Fibrosis Application

*CFTR* gene

### Stargardt Application

*ABCA4*, *CNGB3* and *ELOVL4* genes<sup>(1)</sup>

### Marfan Application

*FBN1* gene<sup>(1)</sup>

### Alport Application

*COL4A3*, *COL4A4* and *COL4A5* genes<sup>(1)</sup>

### Thalassemia Application

3 genes

### Familial Mediterranean Fever Application

*MEFV* gene<sup>(1)</sup>

### Duchenne Muscular Dystrophy Application

*DMD* gene

## Cardiology

### SOPHiA Cardio Solution

31 genes

### Cardio Application

174 genes<sup>(2)</sup>

### SOPHiA Extended Cardio Solution

128 genes<sup>(1)</sup>

### Primary Electrical Disorders Application

51 genes

### Familial Hypertrophic Cardiomyopathy Application

*MYBPC3*, *MYH7*, *MYL2*, *TNNI3* and *TNNT2* genes<sup>(2)</sup>

### Hypercholesterolemia Application Cardio Solution

*APOB* (exon26 partially covered), *APOE*, *LDLR* and *PCSK9* genes + 12 SNPs

#### Turnaround time<sup>(2)</sup>

From **10** to **20** days

#### Detected variants

SNVs, Indels and CNVs

#### Raw material<sup>(2)</sup>

Blood, extracted DNA, saliva and buccal mucosa

#### Turnaround time<sup>(3)</sup>

From **10** to **20** days

#### Detected variants

SNVs, Indels and CNVs

#### Raw material<sup>(3)</sup>

Blood, extracted DNA, saliva and buccal mucosa

kit + data analysis

(1) CNV detection currently not available

(2) Depending on the application

(1) CNV detection available, except from exon 47 of *FLNC* and exons 172-197 of *TTN*

(2) CNV detection currently not available

(3) Depending on the application

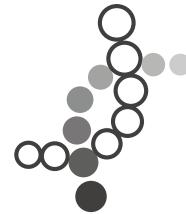

## Metabolism

### SOPHiA Dyslipidemia Solution

31 genes<sup>(1)</sup>

### Maturity Onset Diabetes of the Young Application

ABCC8, GCK, HNF1A, HNF4A, HNF1B,  
*INS* and *KCNJ11* genes<sup>(1)</sup>

## Exome Solutions

### SOPHiA Hereditary Disorder Solution

569 genes

### SOPHiA Whole Exome Solution

> 19,000 genes<sup>(1)</sup>

### SOPHiA Clinical Exome Solution

4,490 genes<sup>(1)</sup>

### Whole Exome Application

> 21,000 genes

Turnaround time <sup>(2)</sup> From <b>10</b> to <b>20</b> days	Detected variants SNVs, Indels and CNVs	Raw material <sup>(2)</sup> Blood, extracted DNA, saliva and buccal mucosa

(1) CNV detection currently not available  
(2) Depending on the application

Turnaround time <sup>(2)</sup> From <b>20</b> to <b>30</b> days	Detected variants SNVs and Indels	Raw material <sup>(2)</sup> Blood, extracted DNA, saliva and buccal mucosa

(1) CNV detection available  
(2) Depending on the application
